

We build the systems behind places where people get better.

Aetii advises the firms that build wellness, longevity and medical centres, and builds and runs the systems those centres operate on: the software, the hardware, and the training for the people who use it.

ADVISORY

Open a centre

From concept and architecture to the device list, the team and the operating model. We stay until it opens and runs.

Shape the programmes

Longevity, metabolic, sleep, recovery and plant-based programmes, written as protocols your own team can run and repeat. Licensed, or written for your brand.

Choose the devices

Which devices earn their place, how each one is used, and how every session is recorded.

HOW A CENTRE COMES TOGETHER

01

Feasibility

Who it is for, what it can earn, what the building allows.

02

Concept and architecture

The guest journey first, then the rooms around it.

03

Programmes and devices

What the centre sells, and only the devices that needs.

04

Systems and team

Bookings, records, reception, reporting; the team trained on them.

05

Opening

Real guests, daily fixes, until it runs without us in the room.

06

Running it

Systems, reports and programme updates, month by month.

You can join at any step.

WHAT WE BUILD

Bookings and records in one system · reception and guest app · AI assistant on WhatsApp and phone · staff training academy · dashboards and weekly reports · hardware installation.

THREE WAYS TO START

System review

Ninety minutes online. A map of every tool and handover, and three fixes you can make this month.

Connect

We connect the tools you already have. Scope and price agreed before we start.

Run

One system for your whole operation, run by us, billed monthly.
